ACQUASLIDE WAVE

The last slide born from the series “acquaslide” is WAVE. . It is built up by a perfectly smooth and bright channel made with reinforced and hand bedded fiberglass and with a starting turret..

It can be differently coloured ...

It can be single or united into several formations...

Sensational novelty of this model is assembling easiness of the whole structure, for the sliding is made only by a sole part.

It is a slide fitted for all, from children, up to whole families, an enjoyment to spend with friends and new companies!!!!
