## BIG JUMP

**BIG JUMP** is one of the last news studied and manufactured by Tecnopiscine International S.r.l., it is constituted by a fibreglass channel 3.00 mts large with side shores reaching one meter height.

Its descent is breathtaking, it happens with 250 cms diameter rubber rings. The rubber dinghies are two-places, inside you are sitting in front of your partner.

During the route the rubber ring slides and rotates several times by creating a continuous effect of fall towards void.
