WATER COAST

WATER COAST is an attraction intended for people wishing to feel strong emotions or to sense an adrenalin thrill thoroughly the whole body.

The slide is constituted by a channel 1.5 mt large with 1.00 mt high parapets, the route is made by a sequence of rises and dips, where the user can go along all its length with single or double rubber rings.

The first stroke is constituted by a mt 15 long descent with at least 45° - 50° slope, so people reach immediately a high speed, always in fullest safety, allowing them to get over the rise they will find immediately after the descent and so on, until the slide end, a sequence of descents and rises...

Usually the slide is constituted by three rises and two drops, but can always be changed both in height and in length according to any request
